

SNUG

Dennis Abalos

SNUG DESIGN INTENT:

The Snug's design intent was to develop a comfortable, low sitting, durable leisure chair for the home and social spaces such as cafes, clubs and bars. Inspired by the essence and form of the iconic bean bag, combined with flexible slats that moulded to a users body contour, the design was achieved. The form was not only designed to be ergonomically comfortable but also to present a flamboyant and funky flair in any space it occupied. Using pearlescent paints for the external finish gave the Snug a unique and striking aesthetic different from everyday chairs.

SNUG DESIGN DESCRIPTION:

The Snug chair is handmade in lacquered thick fibreglass to create an interesting form and sculptural figure.

It provides flexible low comfort seating as slats that flow out from the sides flex in the seat and backrest area, to follow the body contours of each user. The use of pearlescent white, lilac and baby blue paints on the exterior and red orange on the interior gave the Snug a unique gloss finish from everyday chairs. The Snug can be used for many applications whether playing computer games, watching movies or entertaining friends, the Snug fits right into your lifestyle to suit your needs.

SNUG OVERALL DIMENSIONS:

Height: 710mm
